Banking sector monthly data as at the end of July 2026

Based on the data of the National Bank of Poland
reported on: 10 September 2026

Disclaimer

- Material changes in certain values and indicators between December 2025 and January 2026 result from the exclusion of receivables/liabilities towards flow-through funds from the reports submitted by Bank Gospodarstwa Krajowego, as well as the reclassification of these positions, by banks, from the financial sector to the general government sector (according to Resolution No 45/2025 of the Management Board of the National Bank of Poland of 18 December 2025)
- The charts and slides affected by these changes have been marked with the symbol★

Banking sector structure

Structure by client (share in assets)

July 2026 ★

Capital origin (share in assets)

July 2026 ★

At the end of July 2026, there were:

- 30 commercial banks,
- 488 cooperative banks,
- 35 branches of credit institutions.

Banking network

Concentration of the banking sector ★

Concentration ratios

HHI – the Herfindahl-Hirschman index (the sum of squares of banks' shares in the banking sector assets) is a measure of market concentration. The index takes into account not only the number of entities but also their relative size.

CR5 – assets – an indicator representing the share of 5 banks with the highest balance-sheet total.

HHI of 811 indicates a competitive market.

Net profit of the banking sector

Banking sector: net profit at the end of the period (PLN m)

The net profit at the end of July 2026 amounted to PLN 25.2 bn. It was lower by PLN 3.3 bn (-11.6% YoY) than the profit achieved by the sector at the end of July 2025. The monthly net profit in July 2026 amounted to PLN 4.2 bn and was higher by PLN 0.9 bn (+19.9% MoM) than the profit achieved in the previous month.
